Ms Leigh-Anne Funnell
Pain Management Research Institute
Level 2, Douglas Building, Royal North Shore Hospital
Reserve Rd, St. Leonards, NSW 2065 Australia
FAX: +61 2 9463 1002

About the Institute

The Pain Management Research Institute consists of a multidisciplinary group of health professionals and research staff who are collaborating in education and research to improve pain treatment in adults and children. The staff include:

- Medical specialists in pain medicine, psychiatry, rheumatology and palliative care
- Registered nurses;
- Clinical psychologists;
- Physiotherapists; and
- Basic and applied scientists.

Clinical treatment, teaching and research activities extend from acute pain (e.g. post operative and trauma) to chronic non-cancer pain (e.g. low back pain, post amputation pain, herpes) and cancer pain management.

The Institute facilitates an articulated online Masters program in Pain Management, in association with The University of Sydney. Individuals can access single units of study from this program for continuing education purposes.

Pain Management Multidisciplinary Short Course 2015

Week 1: 9 February - 12 February
Week 2: 16 February - 19 February

Pain Management Research Institute

Workshop Outline

This two week (8 days) workshop is based on the IASP core curriculum and facilitated by leading specialists in the field of pain management.
It is designed for professionals with an interest in learning about current views and approaches to the assessment and management of pain.

Week 1: The Problem of Pain

The first week introduces participants to the extent of the problem and explores pain contributors and assessment.

Topic areas include:

- Epidemiology
- The person living with pain
- Acute pain services
- Biopsychosocial aspects of pain
- Pharmacology
- Acute post-surgical pain
- Placebo
- Neuropathic pain
- Visceral pain
- Orofacial pain
- Neuroimmune
- Diagnostic and procedural interventions

Week 2: The Management of Pain

In the second week participants explore current principles of pain management.

Topic areas include:

- Musculoskeletal pain assessment and management
- Psychology of pain: cognitive behavioural therapy
- Ethics
- Pain and mood, and associated risks
- Complementary therapies in pain management
- Role of opioids in chronic non-cancer pain
- Pain and significant others
- Pain in infants, children and the elderly
- Disability and pain rehabilitation issues
- Complex regional pain syndrome
- Interdisciplinary team management

For students enrolled in the Graduate Certificate, Graduate Diploma or Masters, please note that Week 1 essentially covers Semester 1 content and Week 2 covers Semester 2 content of the first year of the program.

Please Note:
Curriculum and speakers subject to final confirmation
