

Statement of Attainment in

Provide Cardio Pulmonary Resuscitation (CPR) HLTAID001

This course is presented in accordance with the current guidelines of the Australian Resuscitation Council (ARC).

The course covers all aspects of resuscitation and basic life support.

Participants train on resuscitation manikins and demonstrate competency in Cardio Pulmonary Resuscitation (CPR). All participants will also be trained in mouth-to-mask resuscitation technique, utilising the Laerdal Pocket Mask.™

Automated External Defibrillation (AED) will be demonstrated during the course in accordance with the "D.R.S.A.B.C.D" Primary Survey.

Specific competencies include:

- ✓ Define the role of resuscitation and when to apply it
- ✓ Assess a scene using the D.R.S.A.B.C.D protocol
- ✓ Assessing and maintaining an airway of an unconscious casualty – the recovery/lateral position
- ✓ Perform Cardio Pulmonary Resuscitation (CPR) techniques on an infant and adult mannequin
- ✓ Identify the differences in resuscitation technique with infants, children and third trimester pregnant casualties
- ✓ Identify airway management techniques with vomiting/regurgitating casualties during resuscitation
- ✓ Identify communicable diseases risk management techniques during resuscitation
- ✓ Perform resuscitation on a mannequin using the Laerdal Pocket Mask™
- ✓ Follow the prompts of an Automated External Defibrillator (AED)

Infant, child and adult mannequins are supplied for training.

- **TRAINING DURATION** 2.0 Hours
- **QUALIFICATION DURATION** 12 Months from the date of issue.
- **ASSESSMENT**
 1. Demonstrate competent resuscitation techniques on a mannequin.
