

DEADLY SCIENCE

Help Aboriginal & Torres Strait Islander learners discover STEM

Founded by Corey Tutt OAM, DeadlyScience started with books and science kits for under-resourced schools. Today, we work with over 1200+ education providers nationwide.

1200+ Schools Supported

Hands-on Stem Kits

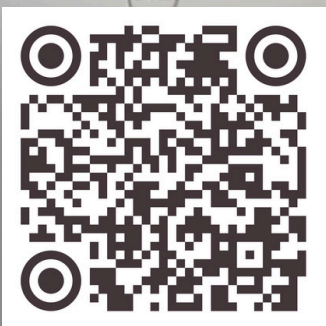

Programs Across Australia

DeadlyScience brings **science, technology, engineering, and maths** to remote and regional communities across Australia.

Donate today to provide STEM resources to young people who need them most.

"Every young mind deserves the chance to explore STEM"
